

**Deliverable Report**

Deliverable No: D6.53  
Dissemination level: Public  
Title: Showcases: Dissemination of results with demo-truck on at least 50 audience locations

Date: 16-05-2018  
Version: **FINAL**  
Author(s): P. Stassen – TPS

Reviewed by: M. Weide - UNR  
Approved by: Coordinator – Paul Stassen – TPS

Grant Agreement Number: 322425  
Project Type: FP7 – ENERGY.2012.2.1.2: Demonstrations of smart multifunctional PV modules  
Project acronym: SUMMIT  
Project title: Smart large lightweight long life Multifunctional PV Module Technology for large Power Installations and Distributed Energy Generation  
Project start date: 01/12/2013  
Project website: <http://www.summit.rtdproject.net>  
Technical coordination: TULiPPS (www.tulipps.com) (NL)  
Project management: TULiPPS / Uniresearch (www.uniresearch.com) (NL)

## Executive Summary

People should be able to see, touch, and handle the products / systems that have been developed by the SUMMIT consortium in order to obtain a good comprehension of **a)** the 120 cells module and mounting system, otherwise difficult to transport, **b)** BIPV product possibilities and innovative functionalities, **c)** the application flexibility of the product and **d)** in case of BIPV the size / dimension flexibility of the product and **e)** the possibilities of colored PV modules.

The demonstration truck has been a huge success. The goal was at least 50 presentations / dissemination activities to potential stakeholders in the industry, and potential customers / partners as well as exhibitions-fairs and conferences (Sunday 2015). In total **105** / dissemination activities have been achieved. 49 presentations have been on external audience locations and 56 have been executed on the new TULiPPS production facility and terrain in Waalwijk. A complete list of the dissemination activities has been added to Appendix 1.

It is estimated more than **2000** people received an introduction about the technologies developed by the SUMMIT partners.

The demo-truck has been extremely useful in convincing customers, partners-suppliers to cooperate with TULiPPS and other SUMMIT consortium members and has yielded very strong results. The presence of the dissemination truck was also very beneficial to accomplish our demonstration projects target for SUMMIT. After a relatively slow start (caused by many reasons) we accomplished more demonstration projects than originally anticipated.

The SUMMIT dissemination truck also proved a great help to achieve impact in the industry, much more than originally anticipated. It helped to get more specialist partner companies on board to further develop and implement in the market the TULiPPS module technology because new supply chain cooperations were started to further improve the TRL level, functionality and overall the market readiness of the innovative long-life module technology by finding acceptance in processes from partner companies (Dutch PRIME and EXTASE projects).

## 2 Introduction

People should be able to see, touch, and handle the products / systems that have been developed by the SUMMIT consortium in order to obtain a good comprehension of **a)** the 120 cells module and mounting system, otherwise difficult to transport, **b)** BIPV product possibilities and innovative functionalities, **c)** the application flexibility of the product and **d)** in case of BIPV the size / dimension flexibility of the product and **e)** the possibilities of colored PV modules.

For this reason, TULiPPS bought a second hand truck and converted this truck into a SUMMIT demo-truck by adding several SUMMIT PV systems for demonstration at trade exhibitions (Intersolar, Vakbeurs Energie, LG Innovation Fair), conferences (Sunday 2015) solar module manufacturers (Voltec Solar in France, Kameleon, TSC, Exasun, Energyra), potential customers for flat roofs projects, housing development companies, SME and large building companies, housing corporations but also stakeholders such as central- and local government, industrial Park Management, potential key-suppliers, as well as one event for the general public (Dutch Design Week).

### 3 Some impressions

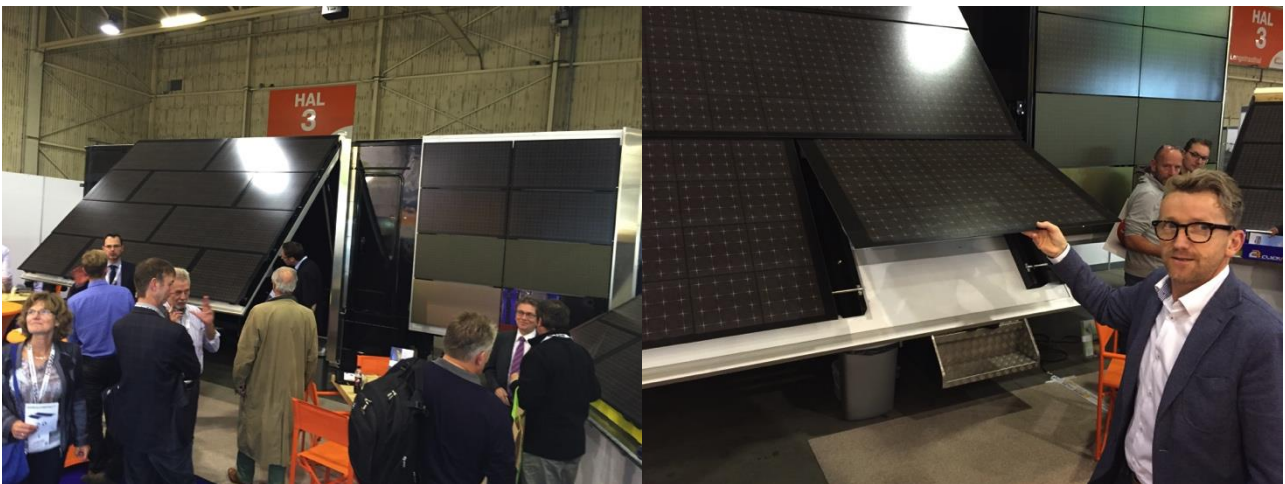

Picture 1 and 2: the demo- / dissemination truck on its way to Intersolar 2015

Picture 3 and 4: the demo- / dissemination truck at the Dutch Design Week (2015). In the rear loading bay of the demonstration truck fits the SUMMIT exhibition booth or 8 units of 120 cells modules.

Picture 5: The demo- / dissemination at LG Innovation Fair in Aachen, Germany (2015)

Picture 6 and 7: The demo- / dissemination at Vakbeurs Energie in Den Bosch The Netherlands

Picture 8: The front of the trailed of demo- dissemination truck.

## 4 Conclusion and Discussion

The demonstration truck has been a huge success. The goal was at least 50 presentations / dissemination activities to potential stakeholders in the industry, and potential customers / partners as well as exhibitions-fairs and conferences (Sunday 2015). In total **105** / dissemination activities have been achieved. 49 presentations have been on external audience locations and 56 have been executed on the new TULiPPS production facility and terrain in Waalwijk. A complete list of the dissemination activities has been added to Appendix 1.

It is estimated more than **2000** people received an introduction about the technologies developed by the SUMMIT partners.

The truck has been used mainly in the Netherlands, but also went to Germany (Intersolar 2015 and Energy Glass and LG Innovation Fair in 2016) and France (Voltec Solar).

The demo-truck has been extremely useful in convincing customers, partners-suppliers to cooperate with TULiPPS and other SUMMIT consortium members and has yielded very strong results. We experienced it was not so easy (in general) to obtain demonstration projects. The dissemination truck was very beneficial to accomplish our target number of demonstration projects for SUMMIT. After a relatively slow start (caused by many reasons) we accomplished more demonstration projects that originally anticipated (Deliverables 5.41 and 5.42).

Moreover, the SUMMIT dissemination truck proved a great help to achieve impact in the industry, much more than originally anticipated. It helped to get more specialist partner companies on board to further develop and implement the TULiPPS module technology for the market. Examples are:

- 1) Prefab Integrated Multifunctional Energyroof (**PRIME**) project. This is a new Dutch consortium consisting of TULiPPS, Linex Prefab daksystemen, Fakro, IBC-Solar and FemtoGrid.
- 2) The demo-truck convinced Plastica Plaat BV (façade systems and materials) to start the cooperation with TULiPPS for solar in facades for high-rise nearly Zero-Energy Buildings. When TULiPPS took over WP4 from Eurotron and started our gluing- and assembly operations we needed a production location. Plastica offered us one of their buildings, showroom and offices and consequently we moved our company from the High Tech Campus in Eindhoven to the location Plastica in Waalwijk. A great synergy.
- 3) EXTASE project. This is a Dutch consortium of TULiPPS and Plastica for solar PV facades together with several BIPV system developers in the Netherlands and back-contact module producer Exasun.

Both PRIME and EXTASE are in “full swing” to increase the TRL level in general by improving application readiness of the Click-&-Go mountings systems as well as further develop the supply chain and manufacturing processes of all partners involved to be better able to serve the needs of the target markets.

Once TULiPPS became more known and established, stakeholders were more willing to visit us in stead of we visiting them. This was beneficial for us in terms of time efficiency and costs. For this reason, after we moved to Waalwijk, 56 audience presentations have been executed on our own premises.

We are now implementing the latest version façade mounting systems on the demo-truck and improve some other topics in order to get ready for a new round of demonstrations. So, the use of the dissemination truck will be continued.

## 5 ACKNOWLEDGEMENT

This project has received funding from the European Union's Seventh Framework Programme for research, technological development and demonstration under grant agreement no 322425 (Project acronym: SUMMIT)
